

Second conference - The Role of Carbon-Capture Storage in the Just Transition to a Low-Carbon Economy

Only a few weeks after the first conference, let's keep the rhythm with a second conference.

This conference is given by **Raphaël Heffron**, Professor for Global Energy Law & Sustainability at the Centre for Energy, Petroleum and Mineral Law and Policy at the **University of Dundee**.

Awarded with the price and title of *Jean Monnet Professor* in the Just Transition to a Low-Carbon Economy (price granted by the European Commission in July 2019), Professor Heffron is a qualified Barrister-at-Law, and a graduate of both Oxford (MSc) and Cambridge (MPhil & PhD). His works have a principal focus on achieving a just transition to a low-carbon economy, and combine a mix of energy law, policy and economics

The theme of this conference fits right in this scheme:

The Role of Carbon-Capture Storage in the Just Transition to a Low-Carbon Economy

In this presentation, Professor Heffron will explain how, with the energy sector transitioning away from fossil fuels and going low-carbon, Carbon-Capture Storage has a key role to play in this transition as it will be needed as a solution. A key component to the energy transition is to ensure it is 'just' and this will be addressed in light of the international movement to secure for society a just transition to a low-carbon economy.

Save the date! November 28th, 2019.

SHS College, Amphi 03, Pau.

NB: Conference in English!
