

Entrepreneurship

Entrepreneurship is encouraged and supported by E2S UPPA, which is diversifying its actions in order to strengthen the links between the university and professional integration.

Course units and events open to all are organized to raise awareness of entrepreneurship among all UPPA students.

For those who already have a project, specific support is implemented with a personalised part and a collective dimension; with workshops and afterworks led by professionals from the socio-economic world. To go further, a new specific university degree was designed.
