Entrepreneurship Winter Camp
3 days to further develop your project of creation of a business company

From January 22, 2020 to January 24, 2020

Following last year’s success, E2S UPPA is organising a second edition of its training camp dedicated to Entrepreneurship.

This year, that Winter Camp will take place in Salies de Béarn, from January 22nd, 2020 to January 24th, 2020.

That « Winter camp » - focused on the themes of Energy and the Environment - will gather about thirty students, teachers and teachers-researchers who are interested either in creating their own enterprise or in disseminating the results of their research and who are willing to dedicate three whole days for a better development of their project.

For some of those participants, who are already working on a project, their purpose is to further study its feasibility by confronting the socio-economic context, the requirements of the regulation in effect, the complexity of funding… for the others, they will focus on confirming their calling as “entrepreneur” or their interest in the transfer of technologies.

Participants will be divided in six teams, each one organised around a project leader. All teams will bet on collective intelligence, interdisciplinarity and team work to progress. They will be supported by professional coaches charged to guide them in their search of specific solutions in sync with the local industrial ecosystem.

Professionals are also invited to share their expertise (intellectual property, accounting, business plan…) and experience with the participants.
At the end of this seminar, a jury made up of industrials and representatives of the local authorities will assess the work carried out during these 3 days as well as the results obtained. Prices will be handed to the laureates.
