

Launching of E2S UPPA conference cycle

E2S UPPA has launched its own **cycle of conferences** on **thematics related with energy and environment**.

These conferences are intended to a wide audience made up of lecturers, researchers and students from the consortium as well as industrial partners, but also to the public out of the university.

With a **montly** occurrence, these conferences are given either by a **reknowned guest or a researcher member of the consortium**. They will take place on **Thursdays afternoon** (4:00 pm), either in Anglet or Pau, and will be preceded by a welcome coffee at 3:30 pm.

As energy and environment are now the hot topics wherever you may go, E2S UPPA is expecting a great participation to these conferences.
