

Talents Academy

Scholarship for promising students

The “Talents’ Academy” scholarship programme is a call for applications which aims at identifying, attracting and retaining very promising students, from France or abroad.

Candidates evaluation is based on their **academic excellence** only!

Laureates receive an allowance so that they can totally focus on studying - in E2S UPPA scientific perimeter.

There are two ways to enter the "Academy":

- * **The “first wave” is restricted to students from foreign “target universities“.**

Candidates do not apply to the call. They are directly proposed by UPPA's teachers-researchers who reinforce their links with those universities and comfort their international strategy.

- * **The “second wave” is addressed to all students.**

Candidates have to apply on their own and submit their application on a dedicated platform.

We seek outstanding candidates excited by the opportunity to shape tomorrow solutions for energy and environment, with a clear passion and willing to to make a difference for the future.
