

# PYRENigmes - feedback on the first edition

The first edition of PYRENigmes took place on February 6th. This life-size treasure hunt aims to promote cross-border mobility and help students to discover places and strategic approaches to prepare their departure.

The UPPA fully organised this event within the framework of the PYREN-E2S project. The brainteasers were built thanks to the collaboration of different services of the university.

Two teams of players (students, PhD students and teachers) had 60 minutes to develop their team spirit and investigative skills in order to find Hugo, a student who had been missing for more than a week!

This first edition was a success for both the participants and the organisers.

Keep your eyes open, a second edition will take place soon!!!
