

E2S UPPA's relations with its partners

E2S UPPA major asset is the strong relationships with its territory.

The initiative is backed by a cluster of several hundreds of companies - CEPyA (Cluster Enterprises Pyrénées Adour) - gathering international companies, SMEs, technological and innovation centres, as well as professional organisations.

Both this cooperation and their support should allow E2S UPPA to assert its strength as an actor of socio-economic vitality and diversification, aiming to stimulate synergies with disruptive research thanks to:

- * structural alliances,
- * partnership research
- * focused high potential technology
- * enhanced interactions between private and academic R&D

The ambition of E2S UPPA is to become within 10 years the brand name for excellence in research and education, dedicated to the societal and economic development of Southern Nouvelle Aquitaine.
