

Preferred academic partnerships

The University of Pau and Pays de l'Adour has initiated an ambitious internationalisation strategy in order to increase the visibility and impact of our research and academic strengths, competences and assets.

UPPA wishes to enhance the international mobility of its students and young researchers as well as to foster links with international partner laboratories and universities.

This international dimension and openness will provide considerable added value to the programmes taught at the university, to the young researchers careers, but also to the University and its laboratories.

Priorities will be given to collaborations between E2S UPPA and the universities targeted in the international road map of the consortium (cf list hereafter).
