

## " Call for applications for PhD grants ", Edition 2017

Laureates list (by alphabetic order)

According to the decision of the Board of Trustees, on November 14<sup>th</sup>, 2017

Candidate	Laboratory	Subject	Thesis Supervisor
AULUS Lucie	ECOBIOIP	Long-term evolution of anadromy in the introduced brown trout ( <i>Salmo trutta</i> ) and its impact on invasion dynamics in Kerguelen Island	Philippe Gaudin
CHATILLON Elise	IPREM/EEM	Diversité microbienne fonctionnelle et biodégradation des hydrocarbures dans un continuum sol-milieu aquatique	Cristiana Cravo-Laureau
CHICHA Elie	LIUPPA	Imagery clarification under the strict respect of differential confidentiality	Richard Chbeir
GARCIA MONTOTO Victor	IPREM/ECP	Speciation Analysis in Biofuels	Brice Bouyssiere
GUO Juncheng	LFC-R	Nanoporous Graphene Membranes for Oil & Gas Applications: Molecular Simulations and Theoretical Modelling	Romain Vermorel
IDRISS Hisham	IPREM	Development of innovative materials made from absorbent polymers in near infrared environment for organic photovoltaic.	Christine Lartigau-Dagron
LAPORTE Elisabeth	PDP	Legal support an assistance in gas exploitation in the context of energy transition.	Jean Gourdou
LECLÈRE Bruno	LFC-R	Crystallization-induced damage under confined reservoir conditions	David Grégoire
RODRIGO DE FREITAS Bruno Moreno	CATT	Utility Business Models in the Presence of Distributed Energy Resources – DER: A Market Analysis Approach and Future Trends	Carole Haritchabalet
SALLES Gabriel	LMAP	On the modelling and statistical analysis of a gamma deteriorating system with imperfect maintenance	Sophie Mercier
PONCET Pierre Antoine	SIAME	Characterization of wave impact loading on structures at full scale: field experiment, statistical analysis and 3D advanced numerical modelling	Stéphane Abadie
WISCHHUSEN Pauline	INRA -NuMeA	Parental selenium and antioxidant status in rainbow trout	B. Fauconneau

E2S Executive Director,  
Gilles Pijaudier-Cabot
